PROFILE

With over 5+ years of experience in IT, including planning, implementation, testing, and deployment of web applications, I am a skilled full-stack .NET developer who contributes regularly to system enhancements and designs.

EMPLOYMENT HISTORY

Software Engineer at Credit Agricole CIB, Singapore

December 2022 — Present

- Collaborated with the software development and testing teams to create robust solutions that met client requirements for functionality, scalability, and performance.
- The product is used by CA-CIB internal team to analyze compliance-related alerts and trading activities.
- The web application is built using .Net 6, CQRS pattern, Minimal APIs, Automapper, MediatR, fluent Validations, and Entity Framework.
- Angular 14 for front-end and Vertical slice architecture.
- PostgreSQL for Database, Gitlab for Version control.
- xUnit testing is implemented in this project.

Software Engineer at Spurtree Technologies Pvt Ltd, India

August 2021 — December 2022

- Portal focuses on companies having a set of multiple Investments, Banks, Board of Directors, Views, etc.
- The web application is built using dotnet framework 4.5 version, entity framework, Web API (REST), SQL Server Database, and Angular 14.
- Using Bitbucket tool for Version control.
- Received gift vouchers from business owners for the on-time project delivery, and appreciation of the work.

Associate Software Engineer at Atos-Syntel Pvt Ltd, India

February 2019 — August 2021

- Worked on Development in front-end designing and backend with SQL database.
- Experience in designing and validating using HTML/CSS and JavaScript for front-end development.
- Worked with WCF services and Web API (Restful/SOAP).
- Discussing new requirements with BA and suggesting ideas to reduce minimum back-end support.
- I've received many SPOT awards from business owners to appreciate my work.
